

Sloper's pre-WWII Die Refurbishment Programme - précis of an article that appeared in the Perfin Society Bulletin N°. 401 (April 2016) - *it's the exception that proves the rule!*

It has long been suspected that J Sloper & Co embarked on a Die Refurbishment Programme based on the existence of a relatively small group of short-lived dies known only on the **dark coloured issue of King George VI**. The issue was introduced progressively from the 10th May 1937, with the low value definitives, ½d - 3d, being replaced (again progressively) by lighter colours from 21st July 1941. The theory is that all of these dies (bar one!), and there are **389** recognised at the moment, would have been destroyed in the "Blitz" on Sloper's Budge Row Works on the night of the 10th May 1941.

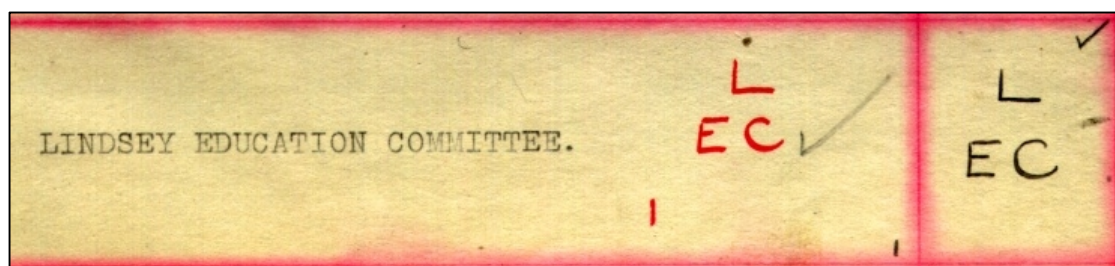

The Bulletin article explored a group of Perfins used by the Lindsey Education Committee, with offices in Lincoln. However, it was the Perfins themselves that formed the focus, and not the organisation. Also fundamental to the debate was a partial, barely visible, wartime slogan cancel, but more of that later.

With regard to pre-WWII and post-WWII Sloper dies, the sequence of events is often:

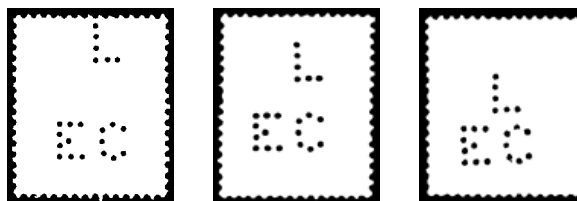

1. **An earlier die**, usually 5 pins high - in this case two dies, "L/E.C" (L1775.02) in use 1902-1910, followed by "L/E.C" (L1775.01) in use 1910-1940, with a latest known date of ... Aug 1940.
2. **A Pre-WWII refurbishment die** which, under normal circumstances, would have been destroyed in the "Blitz" on Sloper's premises on the night of 10th May 1941 - this is "L/EC" (L1770.01a), even though it is known used 27th July 1942 and 4th November 1943. Put simply, it survived the "Blitz"!
3. **A Sloper Wartime Provisional** - this would be "L/EC" (L1770.01p), in use from 1941 to whenever it was replaced by a 'Regular' die.
4. **A replacement 'Regular' die** - in this case it would have been "L/EC" (L1770.01), in use 1945-1950. This die was later re-used from 1960-1975 by the London Executive Council (NHS). Unfortunately, no postmark dates are recorded for either user.

The Lindsey Education Committee are known customers of Sloper's who supplied them with perforated stamps, so it's unlikely that any of the dies mentioned would have been held in their offices in Lincoln.

This is the entry in the m/s ledger for Lindsey Education Committee, and the first thing to notice is that there is no indication of a Sloper Wartime Provisional. The single headed die "L/EC" (which I suspect is L1770.01a) is simply replaced with another single headed "L/EC" die, almost certainly L1770.01. However, the absence of a Sloper Wartime Provisional entry in the ledger doesn't mean the technique wasn't used, but if it was, it was likely to have been short-lived, in this case briefly during 1941.

The evidence for a short-lived SWP - "L/EC" (L1770.01p), which is only known on a 1d 'Q' and 1d & 2½d issue 'R' stamps. Shown below are three examples - on 1d 'R', and 2x2½d 'R'. All three are clearly SWP's, using a standard "L" and constant-spaced "EC".

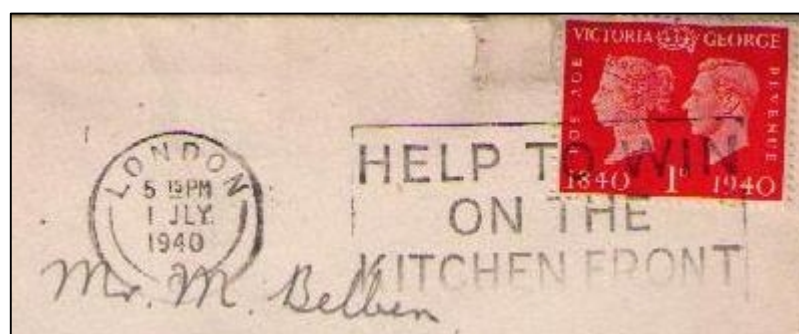

We know from postmark evidence that "L/EC" (L1770.01a) was used on stamps issued *after* the "Blitz" on Sloper's premises as the scan below, supplied by **Ron Mills**, of a 2½d issue 'R' stamp (issued 21st July 1941) shows, clearly postmarked Lincoln, 4th November 1943.

We also know that "L/EC" (L1770.01a) is recorded on the earlier KGVI dark colours stamps (issue 'Q'), as the two 2½d examples below show. The postmarks are indistinct, and have always been regarded as dating to c1941, but on closer inspection part of a large-lettered slogan cancel - "KITC..." on one and "O.../KITCH..." can be made out, and on the other, "O.../KITCHEN ...". The black postmarks blend in with the dark blue colour of the stamp making it difficult to see, but clearly visible under a magnifying glass.

An internet search reveals the full 3-line slogan to be: "HELP TO WIN / ON THE / KITCHEN FRONT".

Ron Mills was able to supply precise dates - some fifty G.P.O. receiving offices used the slogan between the 20th June and the 18th July 1940, and again in January 1941 (but only in Cambridge). I suspect that the two stamps were cancelled during **June/July of 1940** as Cambridge is a bit off the beaten track from Lincoln. This is proof that L1770.01a was used from 1940 [replacing "L/E.C" (L1775.01)], through to at least late 1943, making it a *survivor* of the "Blitz" on Sloper's Works in May 1941.

The following table lists the **392** Perfins thought to have been made as part of the ‘*Sloper pre-WWII Die Refurbishment Programme - 1938-1941*’ - figures correct to **1st January 2019**.

The earliest/latest dates have been listed for confirmation of the footprint in time for these dies.

The earliest to date are:

“JB/∑S” (J0960.02M) known used **7th March 1938**,
 “WB/C” (W0500.01bM) known used **2nd June 1938**, and
 “UR/DC” (U1660.01) known used in **23rd July 1938**.

Any dates later than 10th May 1941 are simply the result of using up ‘old stocks’ of perforated stamps held by the customer.

It can also be seen that, where the configuration of the die is known, the vast majority are single headed.
